29 de octubre 2020
10:00 - 12:30h UTC+01:00
(09:00 - 11:30h hora canaria)

Tres experiencias con OpenAire: taller online de repositorios de REBIUN

Guión

- Contexto.
 - Exposición de metadatos para su difusión.
 - Nuestra relación con los recolectores.
- OpenAIRE
 - Puntos interesantes: Explorer, Monitor, API
- El Dashboard para providers
 - Registro – Validación. Guidelines
 - Histórico de recolección - agregación
 - Enriquecimientos de metadatos – Notificaciones
 - Estadísticas
- Soporte a providers

Contexto

“El valor real de los repositorios recae en el potencial de interconexión para crear una red de repositorios” ([COAR](#))

Tesis doctorales: TESEO

Se basa en la creación de una aplicación compuesta por dos elementos, un script serverless desarrollado en Python y una página web estática desarrollada utilizando el framework Nuxt.js. Juntos, procesan y representan visualmente las incidencias de la vía pública de la Ciudad de Madrid, a partir de datos ofrecidos de forma abierta en el portal de transparencia del Ayuntamiento de Madrid. Como resultado, se pueden obtener en la página web estática gráficos que aportan información sobre los incidentes, así como un mapa que ubica y describe cada incidente en la ciudad. La página web es actualizada diariamente de forma automática y se puede desplegar sin necesidad de crear una infraestructura previa. Para ello se hace uso de la plataforma Cloud de Amazon Web Services."],[[EN] This Master's Thesis develops a serverless project to process open data. It explains the creation of an application that is composed of two elements, a serverless script developed in Python and a static web page developed using the Nuxt.js framework. With these two elements, the application can process and represent the incidents on the public roads of the city of Madrid from, data offered openly on the transparency portal of the Madrid City Council. As a result, it can be obtained a variety of graphics on the static website that provide information about the incidents, as well as a map that locates and describes each incident in the city. The website is updated daily automatically and can be deployed without create a previous infrastructure. To accomplish this, the Amazon Web Services Cloud platform is used.],"keywords" : "Computación en la Nube,Datos Abiertos,Serverless,Python,Nuxt,AWS Lambda,Serverless Computing,Cloud Computing,Open Data"}</script>

SOLICITAR RECOLECCIÓN

- NUEVA VALIDACIÓN
- VER RECIENTES
- INFORME METADATOS OAI-DC
- INFORME ESTADÍSTICAS CTXO
- INFORME METADATOS OAI-OPENAIRE

Para incluir su recurso en el buscador de RECOLECTA, debe cumplir unos requisitos mínimos de calidad que serán verificados por esta herramienta de validación. Le recordamos que el servicio de recolección solo funciona para repositorios españoles.

Validar mi recurso

- ➔ Puede validar su recurso en la sección [NUEVA VALIDACIÓN](#).
- ➔ Una vez que la validación de su recurso dé una valoración de **APTO** en las tres comprobaciones, podrá solicitar su recolección.

Recolectar mi recurso

- ➔ Si ya ha validado su recurso y ha obtenido la calificación de **APTO**, puede solicitar la recolección.
- ➔ Previo a la recolección, el personal técnico de FECYT revisará su última validación.
- ➔ Una vez verificado, el contenido de su recurso aparecerá incluido en el buscador.

Actualmente es administrador de los siguientes recursos, seleccione cual desea que se le recolecte:

RiuNet: Repositorio Institucional de la Universitat Politècnica de València

-Seleccione-

Si no aparece ningún recurso en la lista puede que aún no lo haya dado de alta en [NUEVO RECURSO](#), o que aún no se haya actualizado la información (se actualiza periódicamente).

Abstract(s):

Functional divergence is the process by which new genes and functions originate through the modification of existing ones. Both genetic and environmental factors influence the evolution of new functions, including gene duplication or changes in the ecological requirements of an organism. Novel functions emerge at the expense of ancestral ones and are generally accompanied by changes in the selective forces at constrained protein regions. We present software capable of analyzing whole proteomes, identifying putative amino acid replacements leading to functional change in each protein and performing statistical tests on all tabulated data. We apply this method to 750 complete bacterial proteomes to identify high-level patterns of functional divergence and link these patterns to ecological adaptations. Proteome-wide analyses of functional divergence in bacteria with different ecologies reveal a separation between proteins involved in information processing (Ribosome biogenesis etc.) and those which are dependent on the environment (energy metabolism, defense etc.). We show that [View more...](#)

Evolución proyecto OpenAIRE

The screenshot shows a Trello board titled "OpenAIRE Explore" with a public visibility setting. The board is organized into two main columns: "In progress" and "Planned".

- In progress:** Contains three cards, each with a green progress bar at the top. The cards are: "Redesign research results landing pages" (1 comment), "Redesign projects landing pages", and "Redesign organization landing pages".
- Planned:** Contains four cards with progress bars in orange and yellow. The cards are: "ORCID links available for authors", "Research results different versions available", "Organizations different version available", and "Search filter improvements".
- Bottom card in Planned:** "Simple and advanced search page merge" with a green progress bar.

On the right side, a panel titled "Acerca de este tablero" (About this board) provides details:

- Created by:** OpenAIRE (@openaire_eu), Open Scholarly/Scientific Communicati...
- Descripción:** STATUS: in beta since October 2018. The [OpenAIRE Explore portal](#) provides access to Open Access research content. It is based on OpenAIRE's open scholarly communication graph that includes all research and scholarly activities, spanning all phases of the research life cycle. More info on the [OpenAIRE catalogue](#)
