Metadatos del ítem

Título:	Physicochemical changes and antioxidant activity of juice, skin, pellicle and seed of pomegranate (cv. Mollar de Elche) at different stages of ripening
Autor:	Fernandes, Luana Pereira, José Alberto López Cortés, Isabel Salazar Hernández, Domingo Manuel, Ramalhosa, Elsa
Entidad UPV:	Universitat Politècnica de València, Escuela Técnica Superior de Ingeniería Agronómica y del Medio Natural - Escuela Técnica Superior de Ingeniería Agronómica y del Medi Natural
Fecha difusión:	2015
Resumen:	In the present work, we investigate how the degree of ripeness (low, low-medium, medium and medium-high) affects the physical and compositional changes, as well as antioxidant properties of pomegranate fruit (cv. Mollar ... +)
Palabras clave:	Mollar de Elche cultivar, Fruit constituents, Ripening stages, Physicochemical properties, Antioxidant activity

Bienvenido a RiuNet

RiuNet es el Repositorio Institucional de la Universitat Politècnica de València, gestionado por la Biblioteca, cuyo objetivo es ofrecer acceso en Internet a la producción científica, académica y corporativa de la comunidad universitaria con la finalidad de aumentar su visibilidad y hacerla accesible y preservable. RiuNet responde al compromiso de la Universidad en el marco de la [Iniciativa por el Acceso Abierto de Budapest](#), con su adhesión a la [Declaración de Berlín](#) y su [Política Institucional](#) sobre Acceso Abierto.

RiuNet está pensado para que la Comunidad universitaria archive su producción, personal o institucional en colecciones. Estas están formadas por diferentes tipos de documentos, como objetos de aprendizaje (Polimedia, Laboratorios virtuales y artículos docentes), tesis doctorales, artículos de revistas, mapas, trabajos académicos, trabajos creativos, fondo patrimonial, material docente, multimedia, producción institucional, revistas electrónicas y actas de congresos.

Para solicitudes contacte con [Polisolicita RiuNet](#)

desarrolla un proyecto serverless para procesar datos abiertos.
78 Se basa en la creación de una aplicación compuesta por dos elementos, un script serverless
79 desarrollado en Python y una página web estática desarrollada utilizando el framework Nuxt.js.
80 Juntos, procesan y representan visualmente las incidencias de la vía pública de la ciudad de
81 Madrid, a partir de datos ofrecidos de forma abierta en el portal de transparencia del
82 Ayuntamiento de Madrid. Como resultado, se pueden obtener en la página web estática gráficos
83 que aportan información sobre los incidentes, así como un mapa que ubica y describe cada
84 incidente en la ciudad. La página web es actualizada diariamente de forma automática y se
85 puede desplegar sin necesidad de crear una infraestructura previa. Para ello se hace uso de la
86 plataforma Cloud de Amazon Web Services.", "[EN] This Master's Thesis develops a serverless project to
process open data. It explains the
87 creation of an application that is composed of two elements, a serverless script developed in
88 Python and a static web page developed using the Nuxt.js framework. With these two elements,
89 the application can process and represent the incidents on the public roads of the city of Madrid
90 from, data offered openly on the transparency portal of the Madrid City Council. As a result, it
91 can be obtained a variety of graphics on the static website that provide information about the
92 incidents, as well as a map that locates and describes each incident in the city. The website is
93 updated daily automatically and can be deployed without create a previous infrastructure. To
94 accomplish this, the Amazon Web Services Cloud platform is used."], "keywords" : "Computación en la

SOLICITAR RECOLECCIÓN

- NUEVA VALIDACIÓN
- VER RECIENTES
- INFORME METADATOS OAI-DC
- INFORME ESTADÍSTICAS CTXO
- INFORME METADATOS OAI-OPENAIRE

Para incluir su recurso en el buscador de Recolecta, debe cumplir con los requisitos que cumplirá que cumpla unos requisitos mínimos de calidad que serán verificados por esta herramienta de validación. Le recordamos que el servicio de recolección de Recolecta solo incluye los recursos de los repositorios españoles.

Validar mi recurso

- ➡ Puede validar su recurso en la sección [NUEVA VALIDACIÓN](#).
- ➡ Una vez que la validación de su recurso dé una valoración de **APTO** en las tres comprobaciones, podrá solicitar su recolección.

Recolectar mi recurso

- ➡ Si ya ha validado su recurso y ha obtenido la calificación de **APTO**, puede solicitar la recolección.
- ➡ Previo a la recolección, el personal técnico de FECYT revisará su última validación.
- ➡ Una vez verificado, el contenido de su recurso aparecerá incluido en el buscador.

Actualmente es administrador de los siguientes recursos, seleccione cual desea que se le recolecte:

RiuNet: Repositorio Institucional de la Universitat Politècnica de València

-Seleccione-

Si no aparece ningún recurso en la lista puede que aún no lo haya dado de alta en **NUEVO RECURSO**, o que aún no se haya actualizado la información (se actualiza periódicamente).

Hoja de ruta OpenAIRE explore

The screenshot shows a Trello board titled "OpenAIRE Explore" with a public visibility setting. The board is organized into three columns: "Welcome", "In progress", and "Planned".

- Welcome:** Contains "START HERE" and "Suggestions".
- In progress:** Contains four cards, each with a green progress bar at the top:
 - Redesign research results landing pages (1 comment)
 - Redesign projects landing pages
 - Redesign organization landing pages
 - Redesign content providers landing pages
- Planned:** Contains four cards, each with an orange progress bar at the top:
 - ORCID links available for authors
 - Research results different versions available
 - Organizations different version available
 - Search filter improvements
- Bottom card in Planned:** Simple and advanced search page merge (green progress bar)

A right-hand sidebar titled "Acerca de este tablero" (About this board) provides details:

- Created by:** OpenAIRE (@openaire_eu), Open Scholarly/Scientific Communicati...
- Descripción:** STATUS: in beta since October 2018. The OpenAIRE Explore portal provides access to Open Access research content. It is based on OpenAIRE's open scholarly communication graph that includes all research and scholarly activities, spanning all phases of the research life cycle. More info on the OpenAIRE catalogue

problem hasvesting riunet?	Closed	RiuNet	5 years ago

Every month, on the first Wednesday at 14h30 CET, the OpenAIRE Provide management team are hosting a webinar call with the OpenAIRE content providers community. This will be an opportunity to present and discuss recent developments from OpenAIRE, upcoming releases from the provide related services and other related relevant topics, in particular a time to discuss and give feedback about interoperability issues and the OpenAIRE infrastructure.

OpenAIRE delivers a range of services to implement Open Science. One of its flagship services is the Content Provider Dashboard which is the one-stop-shop web service where all content providers managers (repositories, data archives, journals, aggregators, ODS systems) interact with OpenAIRE.

For ten years OpenAIRE has been harvesting from over 1300 content providers a range of metadata from publications, research data and software via its Guidelines and validator. It is now possible to interact with the registration and validation process, subscribe and view metadata enrichments via the broker service, view aggregated, cleaned usage stats for repository access and also monitor the data source collection in OpenAIRE.

Timeline: These meetings are held every month and are open to all to register. They will last an hour and will provide a perfect opportunity to answer any technical questions with our experts - provide detailed information on the Guidelines, Aggregation process, Usage statistics, Validator.

The meeting structure will be the following: 1st) Relevant updates (5 min.), 2nd) Main topic presentation (30 min.), 3rd) Open discussion on community questions and comments (25 min.).

SUMMARY

Abstract

[EN] Massive Open Online Courses (MOOCs) and Open Educational Resources (OER) are rapidly growing, but are not usually offered in multiple languages due to the lack of cost-effective solutions to translate the different objects comprising them and particularly videos. However, current state-of-the-art automatic speech recognition (ASR) and machine translation (MT) techniques have reached a level of maturity which opens the possibility of producing multilingual video subtitles of publishable quality at low cost. This work summarizes authors' experience in exploring this possibility in two real-life case studies: a MOOC platform and a large video lecture repositior...

OpenAIRE Content Provider Dashboard

One-stop-shop web service where content providers (repositories, data archives, journals, aggregators, CRIS systems) interact with OpenAIRE. It provides the front-end access to many of OpenAIRE's backend services.

The screenshot shows the OpenAIRE PROVIDE dashboard for RiuNet. The interface includes a navigation menu with 'Register', 'Validator', and 'Notifications'. The main dashboard displays key metrics:

- Records collected on 2020-06-29:** 100,676
- Enrichments:** 18,231
- Downloads:** 26,098,123
- Views:** 421

The dashboard also features an 'Aggregation History' section with a list of recent aggregation stages (e.g., TRANSFORM, COLLECT, REFRESH) and their corresponding record counts. A 'Usage Statistics' section includes a line chart showing monthly views from 2019/04 to 2020/09, and a 'Last month's reports' section with buttons for AR1, IR1, RR1, BR1, and BR2.

At the bottom, there are three sections: 'Events - MORE', 'Events - MISSING', and 'Notifications', each listing specific events and their counts.

Abstract(s):

Functional divergence is the process by which new genes and functions originate through the modification of existing ones. Both genetic and environmental factors influence the evolution of new functions, including gene duplication or changes in the ecological requirements of an organism. Novel functions emerge at the expense of ancestral ones and are generally accompanied by changes in the selective forces at constrained protein regions. We present software capable of analyzing whole proteomes, identifying putative amino acid replacements leading to functional change in each protein and performing statistical tests on all tabulated data. We apply this method to 750 complete bacterial proteomes to identify high-level patterns of functional divergence and link these patterns to ecological adaptations. Proteome-wide analyses of functional divergence in bacteria with different ecologies reveal a separation between proteins involved in information processing (Ribosome biogenesis etc.) and those which are dependent on the environment (energy metabolism, defense etc.). We show that
