

Table of contents

Abbreviations.....	V
Introduction	1
1. Legumes.....	1
1.1. General characteristics.....	1
1.2. Nitrogen fixation	1
1.3. Compound leaves	2
1.4. Compound inflorescences	2
1.4.1. Types of inflorescences	2
1.4.2. Secondary inflorescence meristem	3
1.4.3. Genetic regulatory network	4
1.5. Floral development	5
1.5.1. Floral organogenesis.....	5
1.5.2. Floral organogenesis in <i>M. truncatula</i>	6
1.5.3. ABCDE model.....	9
1.6. <i>Medicago truncatula</i> as a model legume.....	10
2. SUPERMAN as a key regulatory gene.....	11
2.1. Functional models	12
2.1.1. Functional <i>SUP</i> model.....	12
2.1.2. Second or alternative functional <i>SUP</i> model.....	12
2.2. Classification of the <i>SUPERMAN</i> mutant alleles.....	13
2.2.1. 'The 'superman' class	13
2.2.1. 'The 'superwoman' class	14
2.2.2. The 'supersex' class	14
2.3. Functional studies of <i>SUP</i> -like genes.....	14
3. Background	15
Objectives.....	16
4. General objective	18
5. Specific objectives	18
Materials and methods	20
1. Biological material.....	22
1.1. Plant material and growth conditions.....	22
1.1.1. <i>Medicago truncatula</i> plants.....	22
1.1.2. <i>Arabidopsis thaliana</i> plants	23
1.2. Bacterial material and growth conditions.....	23
1.2.1. Bacteria strains	23
1.2.2. Growth conditions	24
1.2.3. Media preparation.....	24
2. Sample collection and fixation	24

2.1.	Sample collection for nucleic acids extraction	25
2.2.	Sample collection and fixation for other techniques	26
3.	Microscopic techniques	26
3.1.	Light microscopy: differential interference contrast (DIC) optics	26
3.2.	Macroscopy	27
3.3.	Scanning electron microscopy (SEM)	27
3.3.1.	Critical point processing	27
3.3.2.	Sample dissection	27
3.3.3.	Sample coating and image acquisition	27
3.4.	Image processing.....	28
4.	Molecular techniques	28
4.1.	Plasmid DNA isolation	28
4.2.	Genomic DNA isolation	28
4.2.1.	Genomic DNA isolation for Medicago plants	28
4.2.2.	Genomic DNA isolation for Arabidopsis plants	28
4.3.	Total RNA isolation	29
4.4.	Nucleic acid quantification	29
4.5.	Polymerase chain reaction techniques (PCR).....	29
4.5.1.	Reverse transcription (RT)	31
4.5.2.	Standard DNA PCR.....	31
4.5.3.	Reverse transcription PCR (RT-PCR)	32
4.5.4.	Quantitative PCR (RT-qPCR)	32
4.6.	PCR products visualization and purification.....	32
4.6.1.	Agarose gel electrophoresis	32
4.6.2.	PCR product purification	33
4.7.	Sequencing	33
5.	Cloning techniques	33
5.1.	Ligation reaction.....	33
5.1.1.	DNA ligation reaction	34
5.2.	Gateway technology cloning system.....	34
5.3.	GoldenBraid: multicloning system	35
5.4.	Digestion with restriction enzymes.....	35
5.4.1.	Electroporation.....	35
6.	Complementation and overexpression assays in <i>A. thaliana</i>.....	36
6.1.	Overexpression assay of <i>MtSUP</i> in <i>A. thaliana</i>	36
6.2.	Complementation assay of the <i>sup-5</i> mutant with <i>MtSUP</i>	36
7.	Generation of <i>MtSUP</i> mutants by CRISPR/<i>Cas9</i> system	37
7.1.	Constructs assembly.....	37
7.2.	<i>M. truncatula</i> transformation using leaf explants	41
7.2.1.	Media preparation.....	43
7.2.2.	Agrobacterium preparation.....	45
7.2.2.1.	Pre-culture	45
7.2.2.2.	Culture	45
7.2.3.	Leaf explants preparation.....	46
7.2.4.	Infiltration and co-culture	46
7.2.5.	Callus formation	46
7.2.6.	Somatic embryogenesis.....	46

7.2.7.	Seedlings.....	47
7.2.8.	Phytotron transfer.....	47
8.	RNA <i>in situ</i> hybridization.....	47
8.1.	Solutions preparation.....	47
8.2.	Samples embedding in paraffin.....	48
8.3.	Paraffin block sectioning.....	48
8.4.	Gene fragment cloning.....	49
8.5.	RNA probe transcription and labelling.....	49
8.6.	DIG-labelled probes quantification.....	49
8.7.	Pre-hybridization.....	50
8.8.	Hybridization and washes.....	50
8.9.	Immunodetection of DIG-labelled probes.....	51
9.	Resin cross-sections.....	51
10.	Ovule clearing.....	51
11.	Functional characterization of <i>MtSUP</i> mutants.....	52
11.1.	<i>Tnt1</i> insertional mutant's genotyping.....	52
11.2.	CRISPR/ <i>Cas9</i> mutant's genotype.....	52
11.3.	Phenotypic characterization of <i>MtSUP</i> mutants.....	53
11.3.1.	Macroscopic observations.....	53
11.3.2.	Scanning electron microscopy (SEM) analysis.....	54
11.3.3.	<i>In situ</i> hybridization assays.....	54
11.3.4.	Resin cross-section analysis.....	54
11.3.5.	Ovule clearing analysis.....	54
11.3.6.	Transcripts analysis.....	55
12.	Bioinformatic analysis.....	55
12.1.	Sequence analysis and phylogenetic tree.....	55
12.2.	Microsynteny conservation.....	55
12.3.	Protein alignment.....	56
13.	Accession numbers.....	56
14.	Statistical analysis.....	56
	Results.....	57
	Characterization of <i>MtSUPERMAN</i> in <i>M. truncatula</i>.....	57
1.	Identification of the putative <i>SUPERMAN</i> ortholog in <i>M. truncatula</i> (<i>MtSUPERMAN</i>).....	59
2.	Sequence and microsynteny analysis.....	61
3.	<i>MtSUPERMAN</i> expression analysis.....	63
4.	Complementation of <i>sup-5</i> mutant in <i>A. thaliana</i> by <i>MtSUPERMAN</i>	67
5.	Ectopic expression of <i>MtSUP</i> in <i>A. thaliana</i>	69
6.	Molecular characterization of <i>MtSUP Tnt1</i> insertional mutants.....	72
7.	Molecular characterization of <i>MtSUP</i> CRISPR/ <i>Cas9</i> mutants.....	75
8.	<i>MtSUP</i> mutants show defects in the inflorescence architecture in <i>M. truncatula</i>	77

9. <i>MtSUP</i> mutants show defects in the floral organogenesis in <i>M. truncatula</i>	86
9.1. <i>MtSUP</i> mutants show a delayed floral meristem termination	88
9.2. B-class MADS-box genes are up regulated in <i>MtSUP</i> mutants	89
10. <i>MtSUP</i> mutants show defects in gynoecium and fruit development.....	91
<i>Discussion</i>.....	95
1. Characterization of <i>MtSUPERMAN</i>.....	96
2. Characterization of <i>MtSUP</i> mutants during reproductive development.....	97
2.1. <i>MtSUP</i> plays a role during floral meristem termination and carpel marginal tissue development	97
2.2. <i>MtSUP</i> controls the number of petals, stamens and carpels produced in <i>M. truncatula</i>	98
2.3. <i>MtSUP</i> controls the number of flowers produced in <i>M. truncatula</i>	100
3. Novel functions for a <i>SUP</i>-like gene are linked to novelties during reproductive development in legumes	103
<i>Conclusions</i>	106
Conclusions	108
<i>Publications and awards</i>	109
1. Publications	110
2. Disclosure and Awards	110
2.1. Video presentation.....	110
2.1.1. 12th International Congress of Plant Molecular Biology (IPMB 2018).....	110
2.2. Poster presentation.....	110
2.2.1. 12th International Congress of Plant Molecular Biology (IPMB 2018).....	110
2.2.2. 9th International Conference on Legume Genetics and Genomics (ICLGG 2019). I was awarded as the best poster presentation (300 euros)	110
2.2.3. XXIII Meeting of the Spanish Society of Plant Physiology and the XVI Hispano-Portuguese Congress of Plant Physiology.	110
2.3. Oral presentation	110
2.3.1. 1st PhD Meeting in Plant Science in Pamplona, Spain.	110
