

---

|   |    |
|---|----|
| <b>Chapter 1. Introduction</b> .....  | 1  |
| 1.1. Solar fuels as sustainable alternative to fossil fuels .....   | 3  |
| 1.2. Heterogeneous photocatalysis .....   | 6  |
| 1.3. Metal-organic frameworks .....   | 10 |
| 1.4. Metal-organic frameworks as photocatalysts.....  | 13 |
| 1.5. General photocatalytic reaction mechanisms using MOFs.....   | 16 |
| 1.6. MOF-based photocatalyst for water splitting .....  | 19 |
| 1.7. MOF-based photocatalyst for CO <sub>2</sub> reduction .....  | 21 |
| 1.8. Photocatalytic MOF stability .....   | 23 |
| 1.9. Bibliography.....  | 24 |
| <b>Chapter 2. Objectives</b> .....  | 29 |
| <b>Chapter 3. Influence of co-catalysts on the photocatalytic activity of MIL-125(Ti)-NH<sub>2</sub> in the overall water splitting</b> ..... | 33 |
| 3.1. Abstract .....   | 35 |
| 3.2. Introduction .....   | 35 |
| 3.3. Experimental Section .....   | 37 |
| 3.3.1. Materials .....  | 37 |
| 3.3.2. Catalyst Preparation .....   | 37 |
| 3.3.2.1 Synthesis of MIL-125(Ti)-NH <sub>2</sub> .....  | 37 |
| 3.3.2.1 Synthesis of MIL-125(Ti).....   | 37 |
| 3.3.2.2 Preparation of metal nanoparticles (MNPs, M: Pt, CoO <sub>x</sub> and RuO <sub>x</sub> ) on MIL-125(Ti)-NH <sub>2</sub> .....         | 38 |
| 3.4. Catalyst characterization.....   | 38 |
| 3.5. Photocatalytic experiments.....  | 39 |
| 3.5.1. Photocatalytic overall water splitting tests.....  | 39 |
| 3.5.2. Monochromator experiments.....   | 39 |
| 3.5.3. Quenching experiments using MeOH or Ce(NO <sub>3</sub> ) <sub>3</sub> .....  | 40 |
| 3.5.4. Labelled H <sub>2</sub> <sup>18</sup> O experiment.....  | 40 |
| 3.5.5. Experiment under natural sunlight irradiation .....  | 40 |

|   |            |
|---|------------|
| 3.6. Results and discussion.....  | 40         |
| 3.6.1. Catalyst preparation and characterization .....  | 40         |
| 3.6.2. Photocatalytic overall water splitting experiments.....  | 45         |
| 3.7. Conclusions.....   | 55         |
| 3.8. Bibliography.....  | 57         |
| 3.9 Supporting information.....   | 60         |
| <b>Chapter 4. Plasma-Induced Defects Enhance the Visible Light Photocatalytic Activity of MIL-125(Ti)-NH<sub>2</sub> for Overall Water Splitting.....</b>               | <b>81</b>  |
| 4.1. Abstract .....   | 83         |
| 4.2. Introduction.....  | 83         |
| 4.3. Results and discussion.....  | 85         |
| 4.3.1. Photocatalyst preparation and characterization.....  | 85         |
| 4.4. Photocatalytic activity.....   | 91         |
| 4.4.1. Photocatalytic overall water splitting.....  | 91         |
| 4.4.2. Photocatalytic water splitting in the presence of methanol. ....   | 94         |
| 4.4.3. Reaction mechanism / Photoelectrochemical measurements .....   | 98         |
| 4.5. Conclusion .....   | 100        |
| 4.5. Experimental section.....  | 100        |
| 4.5.1. Materials .....  | 100        |
| 4.5.3. Oxygen plasma treatment.....   | 101        |
| 4.5.4. Catalyst characterization.....   | 101        |
| 4.5.5. Photocatalytic water splitting experiments .....   | 102        |
| 4.5.6. Methyl viologen (MV <sup>2+</sup> ) experiments .....  | 102        |
| 4.5.6. Photocurrent measurements .....  | 103        |
| 4.6. Bibliography.....  | 104        |
| 4.7. Supporting information.....  | 106        |
| <b>Chapter 5. Design of cost-efficient and photocatalytically active Zn-based MOFs decorated with Cu<sub>2</sub>O nanoparticles for CO<sub>2</sub> methanation.....</b> | <b>121</b> |
| 5.1. Abstract .....   | 123        |

---

|  |     |
|--|-----|
| 5.2. Introduction .....  | 123 |
| 5.3. Bibliography .....  | 133 |
| 5.4. Supporting information .....  | 135 |
| 5.4.1. General methods and materials .....   | 135 |
| 5.4.1.1. Synthesis of MOF(Zn)-1 .....  | 135 |
| 5.4.1.2. Synthesis of MOF(Zn)-2 .....  | 135 |
| 5.4.1.3. Synthesis of MOF-74(Zn) .....   | 135 |
| 5.4.1.4. Synthesis of MIL-125(Ti)-NH <sub>2</sub> .....  | 135 |
| 5.4.1.5. Synthesis of CuO <sub>2</sub> @MOFs using the photodeposition method (PD) .....   | 136 |
| 5.4.2. Structural features of MOF(Zn) .....  | 136 |
| 5.4.3. Catalytic tests .....   | 142 |
| 5.4.3.1. Catalyst characterization .....   | 142 |
| 5.4.3.2. Photocatalytic methanation tests .....  | 142 |
| 5.4.5. Determination of valence band energies and optical gaps. ....   | 152 |
| 5.4.6. Bibliography .....  | 154 |
| <b>Chapter 6. A Robust Titanium Isophthalate Metal-Organic Framework for Visible Light Photocatalytic CO<sub>2</sub> Methanation</b> ..... | 155 |
| 6.1. Abstract .....  | 157 |
| 6.2. Introduction .....  | 157 |
| 6.3. Results and discussion .....  | 161 |
| 6.3. Experimental procedures .....   | 182 |
| 6.3.1. Synthesis of MIP-208 (small scale) .....  | 182 |
| 6.3.2. Synthesis of MIP-208 (scale-up) .....   | 183 |
| 6.3.3. Typical synthesis of MTV-MIP-208 .....  | 183 |
| 6.3.4. Photocatalytic methanation tests .....  | 183 |
| 6.3.5. X-ray crystallographic data .....   | 184 |
| 6.6. Bibliography .....  | 185 |
| 6.7. Supporting information .....  | 189 |

---

|   |            |
|---|------------|
| 6.7.1. Materials and instruments .....  | 189        |
| 6.7.2. Photoluminescence measurements .....   | 190        |
| 6.7.3. X-ray crystallography .....  | 191        |
| 6.7.4. Solid-state NMR data of MIP-208 .....  | 192        |
| 6.7.5. Bibliography.....  | 193        |
| <b>Chapter 7. Toward solar-driven photocatalytic CO<sub>2</sub> methanation under continuous flow operation using benchmark MIL-125(Ti)-NH<sub>2</sub> supported ruthenium nanoparticles.....</b> | <b>211</b> |
| 7.1. Abstract .....   | 213        |
| 7.2. Introduction .....   | 213        |
| 7.3. Experimental section.....  | 215        |
| 7.3.1. Materials .....  | 215        |
| 7.3.2 Catalyst preparation .....  | 215        |
| 7.3.2.1. Synthesis of MIL-125(Ti)-NH <sub>2</sub> .....   | 215        |
| 7.3.2.2. Catalyst characterization.....   | 216        |
| 7.3.2.3. Photocatalytic experiments.....  | 217        |
| 7.3.2.4. Photocurrent measurements .....  | 217        |
| 7.3.2.5. Fluorescence experiments .....   | 218        |
| 7.3.3 Results and discussion .....  | 218        |
| 7.3.3.1. Photocatalyst preparation.....   | 218        |
| 7.4. Photocatalytic activity.....   | 225        |
| 7.4.1. Photocatalytic CO <sub>2</sub> methanation under batch conditions .....  | 225        |
| 7.4.2. Photocatalyst stability under batch and continuous flow operations ..  | 230        |
| 7.4.3. Reaction mechanism.....  | 233        |
| 7.5. Conclusions.....   | 237        |
| 7.6. Bibliography.....  | 239        |
| 7.7. Supporting information.....  | 242        |
| <b>Chapter 8. Conclusions .....</b>   | <b>258</b> |
| <b>Chapter 9. Abstract of the Thesis .....</b>  | <b>259</b> |

|  |     |
|--|-----|
| 9.1. <i>Abstract</i> .....                               | 261 |
| 9.2. <i>Resumen</i> .....                                | 262 |
| 9.4. <i>Resum</i> .....                                  | 263 |
| <b>Annex I. Research articles and conferences</b> .....  | 265 |
| <i>Publications related with the Thesis report</i> ..... | 267 |
| Other publications .....                                 | 269 |
| Participation in conferences .....                       | 275 |
