Office for Open Research

About us

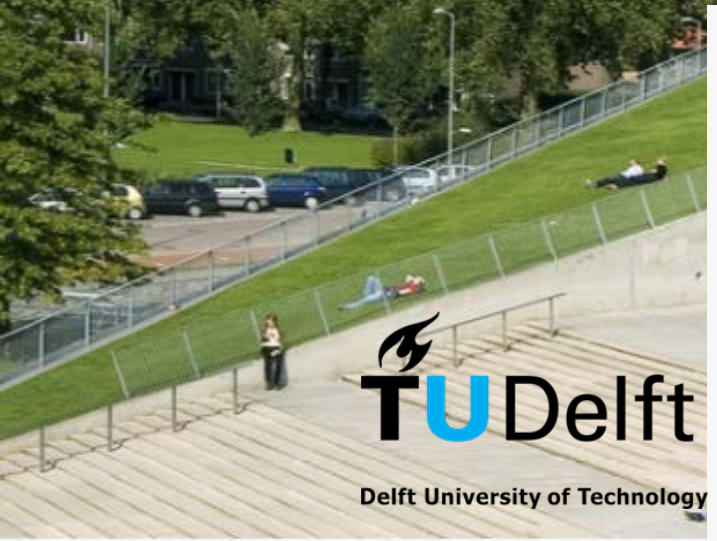
Led by the Library, the Office for Open Research supports the University's aims to create a more open and responsible research environment.

Learn more

Our partnerships

Through the network we are enhancing the support already provided to researchers, accelerating the uptake of Open Research practices. The network partners are:

- Library
- Research IT
- Research Strategy
- Information Governance
- Research Governance, Ethics and Integrity
- Research Services
- Research Degrees and Researcher Development
- Manchester University Press
- Communications and Marketing
- Open Research Network



Digital Competence Centre

Modern research increasingly relies on digital tools for collecting, processing, and storing data, as well as writing reusable code, (co-)developing software, and sharing results with the research community. To ensure effective utilization of these tools, researchers require digital skills to support and implement new digital workflows in their own research.

The TU Delft Digital Competence Centre (DCC) is an on-campus initiative to help researchers make research data FAIR, improve research software, and apply computing practices to increase the efficiency of the research process. The DCC is an initiative of the Open Science Programme at TU Delft designed to benefit researchers at all levels.

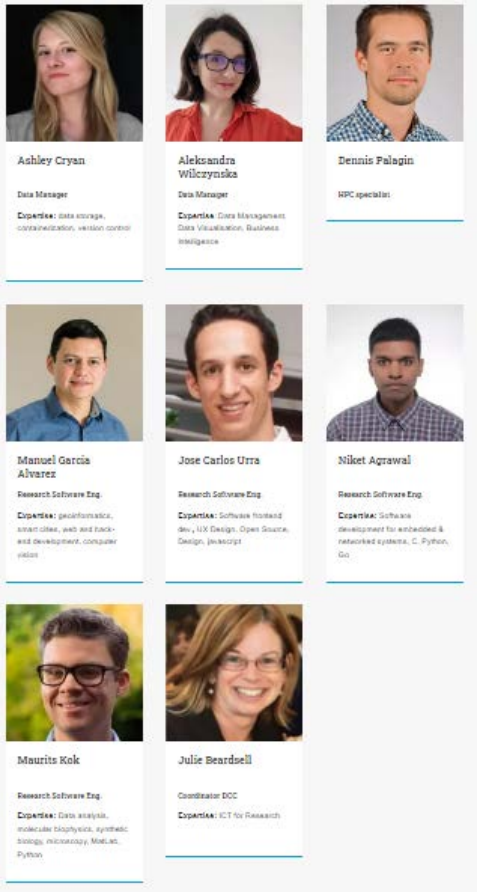
Our purpose

The DCC is home to a support team consisting of data managers, research software engineers, and a high performance computing (HPC) specialist. Our purpose is to help researchers produce FAIR data, improve research software, and apply suitable computing practices to increase the efficiency of the research process. The support team is an addition to the broader group of stakeholders, which also includes the Faculty's ICT Managers and Data Stewards.

Our team

Click on each member's profile image to learn more about their background and expertise.

Curious about who we are?



siempre nos quedara parís

¿o no?
