INDEX

INDEX I
TABLE OF FIGURES VII
TABLE OF TABLES XXI
TABLE OF SYMBOLS XXV
TABLE OF ABBREVIATIONS XXIX
CHAPTER I: INTRODUCTION 1
1 INTRODUCTION 1
2 OBJECTIVES 5
3 STRUCTURE OF THE THESIS 6
CHAPTER II: STATE OF ART 9
1 INTRODUCTION 9
2 LITERATURE REVIEW 11
2.1 STATIONARY REGIME 12
2.1.1 STATOR ASYMMETRY 12
2.1.2 ECCENTRICITY 13
2.1.3 ROTOR ASYMMETRY 15
2.2 TRANSIENT REGIME 19
2.2.1 STATOR ASYMMETRY 19
2.2.2 ECCENTRICITY 19
2.2.3 ROTOR ASYMMETRY 20
2.3 NON-STATIONARY STOCHASTIC REGIME 23
3 SUMMARY AND CONCLUSIONS OF THE CHAPTER 28
CHAPTER III: FAULTS TO BE DIAGNOSED 31
1 INTRODUCTION 31
2 ROTOR ASYMMETRY 33
2.1 SQUIRREL CAGE MACHINE 34
2.1.1 SQUIRREL CAGE ROTOR INDUCTION MACHINE: HARMONIC COMPONENT IN THE STATOR OF A HEALTHY MACHINE 34
2.1.2 SQUIRREL CAGE ROTOR INDUCTION MACHINES: HARMONIC COMPONENTS INDUCED IN THE STATOR BY THE EXISTENCE OF A BAR BREAKAGE 35
2.1.2.1 ELECTROMAGNETIC HARMONIC COMPONENTS 35
2.1.2.2 ELECTROMAGNETIC-MECHANICAL HARMONIC COMPONENTS 38
2.1.3 SUMMARY AND CONCLUSIONS OF THE HEALTHY AND FAULTY FREQUENCIES FOR SQUIRREL CAGE ROTOR INDUCTION MACHINES 40
2.2 WOUND ROTOR INDUCTION MACHINE 42
2.2.1 WOUND ROTOR INDUCTION MACHINE: HARMONIC COMPONENTS IN THE STATOR CURRENT FOR HEALTHY MACHINE 43
2.2.1.1 HARMONICS CAUSED BY THE FUNDAMENTAL STATOR CURRENT SHEET 43
2.2.1.2 HARMONIC GENERATED BY THE HARMONIC STATOR CURRENT SHEETS 44
2.2.2 WOUND ROTOR INDUCTION MACHINES: HARMONIC STATOR CURRENT COMPONENTS FOR ROTOR ASYMMETRY 46

2.2.3 SUMMARY AND CONCLUSIONS OF THE FREQUENCIES FOR HEALTHY AND FAULTY MACHINE FOR WOUND ROTOR INDUCTION MACHINES 47
3 STATOR ASYMMETRY 50
3.1 INDUCED FREQUENCIES IN THE ROTOR DUE TO THE STATOR CURRENT IN HEALTHY STATE 51
3.2 INDUCED FREQUENCIES IN THE ROTOR WINDING DUE TO THE STATOR CURRENT IN FAULTY STATE 52
3.3 SUMMARY OF THE FREQUENCIES IN HEALTHY AND FAULTY STATE FOR WOUND ROTOR INDUCTION MACHINES 54
4 ECCENTRICITY 54
5 SUMMARY AND CONCLUSIONS OF THE CHAPTER 58
CHAPTER IV: PROPOSED METHODOLOGY 61
1 INTRODUCTION 61
2 SIGNAL ACQUISITION 65
3 EXTRACTION OF THE FAULT COMPONENT 66
4 COMPUTATION OF THE ENERGY 68
5 COMPUTATION OF THE INSTANTANEOUS FREQUENCY 69
6 DIAGNOSTIC DECISION 69
7 SUMMARY AND CONCLUSIONS OF THE CHAPTER 72
CHAPTER V: SIGNAL ACQUISITION 75
1 INTRODUCTION 75
1.1 HISTORICAL INTRODUCTION TO SIGNAL PROCESSING 75
2 BASIC CONCEPTS OF DIGITAL SIGNAL PROCESSING 77
3 CONTINUOUS SIGNALS VERSUS DISCRETE SIGNALS 80
3.1 THE CONCEPT OF FREQUENCY IN CONTINUOUS AND DISCRETE TIME SIGNALS 81
3.1.1 CONTINUOUS TIME SINUSOIDAL SIGNALS 81
3.1.2 DISCRETE TIME SINUSOIDAL SIGNALS 82
4 ANALOGUE-DIGITAL CONVERSION 84
4.1 SAMPLING OF ANALOGUE SIGNALS 85
4.1.1 QUANTIFICATION OF CONTINUOUS AMPLITUDE SIGNALS 89
4.1.2 QUANTIFICATION OF SINUSOIDAL SIGNALS 90
4.2 CODIFICATION OF QUANTIFIED SAMPLES 91
5 SUMMARY AND CONCLUSIONS OF THE CHAPTER 92
CHAPTER VI: EXTRACTION OF THE FAULT COMPONENT. SIGNAL FILTERING AND SIGNAL FREQUENCY SHIFTING 93
1 INTRODUCTION 93
2 SIGNAL FILTERING 93
2.1 WAVELET TRANSFORM 94
2.1.1 INTRODUCTION 94
2.1.2 CONTINUOUS WAVELET TRANSFORM 96
2.1.3 DISCRETE WAVELET TRANSFORM 97
2.1.4 MULTIRESOLUTION BANK FILTER ANALYSIS 97
2.1.5 WAVELET TRANSFORM FILTERING 98
2.2 WAVELET PACKET TRANSFORM 101

2.2.1 WAVELET PACKET TRANSFORM FILTERING 101
2.3 SPECTRAL FILTER 103
2.3.1 SPECTRAL FILTERING 106
2.4 EXAMPLE: DECOMPOSITION OF A CHIRP WAVE B MEANS OF THE DWT, WP AND SPECTRAL FILTER 107
3 FREQUENCY SHIFTING 112
3.1 INTRODUCTION 112
3.2 DISPLACEMENT FREQUENCY THEOREM (DIFT) 112
3.3 HILBERT TRANSFORM (HT) 115
4 SUMMARY AND CONCLUSIONS OF THE CHAPTER 119
CHAPTER VII: COMPUTATION OF THE INSTANTANEOUS FREQUENCY 121
1 INTRODUCTION 121
2 COMPUTATION OF THE INSTANTANEOUS FREQUENCY THROUGH THE HILBERT TRANSFORM 121
3 COMPUTATION OF THE INSTANTANEOUS FREQUENCY THROUGH THE TEAGER-KAISER OPERATOR 122
4 SUMMARY AND CONCLUSIONS OF THE CHAPTER 123
CHAPTER VIII: OBJECTIVE DIAGNOSTIC PARAMETERS 125
1 INTRODUCTION 125
2 FAULT INDICATORS BASED ON THE COMPUTATION OF THE ENERGY 125
2.1 COMPUTATION OF THE ENERGY IN THE TIME DOMAIN 126
2.2 COMPUTATION OF THE ENERGY IN THE FREQUENCY DOMAIN 126
3 LINEAR REGRESSION 127
4 SIMILITUDE COEFFICIENT 128
5 SUMMARY AND CONCLUSIONS OF THE CHAPTER 131
CHAPTER IX: ROTOR ASYMMETRY. VALIDATION OF THE PROPOSED METHODOLOGY 133
1 INTRODUCTION 133
2 MAIN FAULT HARMONICS 135
2.1 UNIVERSAL MACHINE 135
2.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 137
2.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A WAVELET PACKET FILTER 146
2.1.3 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 154
2.2 TESTS ON THE COMMERCIAL MACHINE 159
2.2.1 GENERATOR MODE 160
2.2.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 161
2.2.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 164
2.2.2 MOTOR MODE 167

2.2.2.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULTS COMPONENTS THROUGH A DWT FILTER 168
2.2.2.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENT THROUGH A SPECTRAL FILTER 171
3 HIGH ORDER FAULT COMPONENTS 174
3.1 FAULT COMPONENTS OF ORDER (5-6·s)·fred 175
3.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 175
3.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A WP FILTER 182
3.1.3 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 182
3.2 HIGH ORDER FAULT COMPONENT OF ORDER (7-6·s)·fred 185
3.2.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 185
3.2.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 188
4 SUMMARY AND CONCLUSIONS OF THE CHAPTER 190
CHAPTER X: STATOR ASYMMETRY. VALIDATION OF THE PROPOSED METHODOLOGY 193
1 INTRODUCTION 193
2 VALIDATION OF THE METHODOLOGY 194
2.1 UNIVERSAL MACHINE 194
2.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 195
2.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 200
2.2 COMMERCIAL MACHINE 203
2.2.1 GENERATOR MODE 204
2.2.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 204
2.2.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 207
2.2.2 MOTOR MODE 208
2.2.2.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 209
2.2.2.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 211
3 SUMMARY AND CONCLUSIONS OF THE CHAPTER 212
CHAPTER XI: MIXED ECCENTRICITY. VALIDATION OF THE PROPOSED METHODOLOGY 215
1 INTRODUCTION 215
2 VALIDATION OF THE METHODOLOGY 216
2.1 SQUIRREL CAGE ROTOR INDUCTION MACHINE 216

2.1.1 SQUIRREL CAGE ROTOR INDUCTION MACHINE: CASE 1 218
2.1.1.1 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A DWT FILTER 219
2.1.1.2 DIAGNOSIS BASED ON THE EXTRACTION OF THE FAULT COMPONENTS THROUGH A SPECTRAL FILTER 221
2.1.2 SQUIRREL CAGE ROTOR INDUCTION MACHINE: CASE 2, 3 AND 4 223
2.2 WOUND ROTOR INDUCTION MACHINE 226
3 SUMMARY AND CONCLUSIONS OF THE CHAPTER 230
CHAPTER XII: DIAGNOSIS OF MACHINES FED FROM VSD AT STEADY AND VARIABLE FREQUENCY 231
1 INTRODUCTION 231
2 MACHINE FED FROM A VSD AT CONSTANT FREQUENCY AND VARIABLE SLIP 232
3 MACHINE FED FROM A VSD AT VARIABLE FREQUENCY AND CONSTANT SLIP 237
4 MACHINE FED FROM A VSD AT VARIABLE FREQUENCY AND SLIP 242
5 SUMMARY AND CONCLUSIONS OF THE CHAPTER 245
CHAPTER XIII: CONCLUSIONS 247
CHAPTER XIV: FUTURE RESEARCH 251
CONTRIBUTIONS 253
REFERENCES 255
ANNEX I: TESTED MACHINES 269
1 UNIVERSAL MACHINE 269
2 WOUND ROTOR INDUCTION MACHINE 15 CV 270
3 SQUIRREL CAGE ROTOR INDUCTION MACHINE 271
4 600 W WOUND ROTOR INDUCTION MACHINE 272
ANNEX II: AUXILIARY EQUIPMENT AND SWITCHGEAR 273
