Contents

1 Introduction 1

1.1. Background 1

1.2. Mobile wireless ad hoc networks 3

1.2.1. Main features 4

1.2.2. Applications 5

1.3. Routing protocols for wireless ad hoc networks 7

1.3.1. Design of routing protocols 8

1.3.2. Classification 8

1.4. Problem definition and objectives 10

1.5. Structure of the document and contributions 11

2 Video Streaming Services over MANETs: Challenges and Prospects 13

2.1. Capacity of wireless ad hoc networks 13

2.2. Mobility of nodes 21

2.3. Video streaming over MANETS 22

2.3.1. Video quality measurement 23

2.3.2. Video assessment 24

2.4. Real testbeds 30

2.4.1. Network setup 30

2.4.2. Video evaluation in a real testbed 32

2.5. Classification of solutions proposed in the literature 34

2.6. Conclusion 36

3 Video Streaming over Ad Hoc Networks using Hierarchical Routing 39
3.1. Introduction 39
3.2. Related work 41
3.3. Hierarchical routing proposal: Hierarchical OLSR 43
3.4. Routing performance evaluation 48
3.4.1. Routing performance metrics and simulation scenario 48
3.4.2. Routing simulation results 49
3.5. Video performance evaluation 51
3.5.1. Video simulation scenario 51
3.5.2. Video performance metrics 52
3.5.3. Video simulation results 53
3.6. Improving QoS over HOLSR 57
3.6.1. Drawbacks for QoS guarantees 58
3.6.2. Load balancing and distributed admission control for QoS 59
3.7. Conclusion 63

4 Altruistic OLSR: A Cross-layer Recovering Mechanism for MANETs 65
4.1. Introduction 65
4.2. Related work 68
4.3. Altruistic recovery 69
4.3.1. Candidate selection 71
4.3.2. Cache 74
4.3.3. Video awareness 75
4.4. Evaluation 77
4.4.1. Sample network 77
4.4.2. Random scenario 80
4.4.3. Resource consumption considerations 84
4.5. Conclusion 88
