<b>I</b>	<b>Noise barriers based on rubber crumb cylinders</b>	<b>1</b>
<b>1</b>	<b>Introduction</b>	<b>3</b>
1.1	Traffic noise pollution . . . . .	3
1.2	Rubber crumb as acoustic absorbent . . . . .	4
1.3	Sonic crystals . . . . .	5
1.3.1	Sonic crystals as noise barriers . . . . .	6
1.4	Objectives . . . . .	7
<b>2</b>	<b>Multiple scattering theory</b>	<b>9</b>
2.1	The acoustic wave equation . . . . .	9
2.2	Scattering by a single cylinder . . . . .	12
2.2.1	Fluid cylinder . . . . .	14
2.2.2	Rigid cylinder . . . . .	16
2.2.3	Cylindrical shell . . . . .	16
2.3	Arbitrary located scatterers . . . . .	18
2.4	Periodic arrays of scatterers . . . . .	20
<b>3</b>	<b>Rubber crumb modelling</b>	<b>25</b>
3.1	Introduction . . . . .	25
3.1.1	Empirical models . . . . .	26
3.1.2	Phenomenological models . . . . .	26
3.1.3	Microstructural models . . . . .	27
3.2	Acoustic model of rubber crumb . . . . .	29
3.2.1	Dynamic mass density . . . . .	30
3.2.2	Bulk modulus . . . . .	31
3.3	Parameters of rubber crumb . . . . .	32
3.3.1	Flow resistivity . . . . .	33

3.3.2	Tortuosity . . . . .	33
3.3.3	Porosity . . . . .	34
3.3.4	Shape factors . . . . .	34
3.3.5	Complete model . . . . .	34
<b>4</b>	<b>Experimental characterization</b>	<b>39</b>
4.1	Experimental setup . . . . .	39
4.2	Results . . . . .	44
4.2.1	Barrier made of rigid cylinders . . . . .	44
4.2.2	Barrier made of rubber crumb cylinders . . . . .	49
4.3	Discussion . . . . .	52
<b>5</b>	<b>Optimum barrier design</b>	<b>57</b>
5.1	Introduction . . . . .	57
5.2	Multiple reflection model . . . . .	58
5.3	Optimization model . . . . .	60
5.4	Results . . . . .	65
5.5	Experimental Verification . . . . .	66
<b>II</b>	<b>Noise barriers based on microperforated cylinders</b>	<b>71</b>
<b>6</b>	<b>Introduction</b>	<b>73</b>
6.1	Microperforated panels . . . . .	73
6.2	Objectives . . . . .	76
<b>7</b>	<b>Theoretical model of microperforated cylinders</b>	<b>77</b>
7.1	Impedance of a perforation . . . . .	77
7.1.1	Internal part . . . . .	78
7.1.2	Viscous end correction . . . . .	80
7.1.3	Mass end correction . . . . .	81
7.1.4	Nonlinear effects . . . . .	82
7.1.5	Grazing flow effects . . . . .	83
7.1.6	Total impedance . . . . .	84
7.2	Microperforated panels . . . . .	84
7.3	T matrix of microperforated cylinders . . . . .	87

7.3.1	Hollow microperforated cylinder . . . . .	87
7.3.2	Microperforated cylinder with porous core . . . . .	89
7.3.3	Cylinder with two perforated shells . . . . .	91
7.3.4	Numerical verification . . . . .	92
7.3.5	Experimental verification . . . . .	93
<b>8</b>	<b>Experimental characterization</b>	<b>99</b>
8.1	Experimental setup . . . . .	99
8.1.1	Samples . . . . .	99
8.1.2	Measurement method . . . . .	106
8.1.3	Experimental setup . . . . .	108
8.2	Results . . . . .	110
8.3	Discussion . . . . .	116
<b>9</b>	<b>Optimum barrier design</b>	<b>119</b>
9.1	Optimization model . . . . .	119
9.2	Results . . . . .	122
9.3	Optimization of the perforations . . . . .	125
<b>10</b>	<b>Anomalous absorption in lattices of perforated shells</b>	<b>129</b>
10.1	Introduction . . . . .	129
10.2	Samples and theoretical approach . . . . .	132
10.3	Loss-less scatterers . . . . .	133
10.4	Lossy scatterers . . . . .	138
<b>III</b>	<b>Acoustic cloaking</b>	<b>145</b>
<b>11</b>	<b>Introduction</b>	<b>147</b>
11.1	Acoustic cloaking . . . . .	147
11.2	Objectives . . . . .	150
<b>12</b>	<b>Reduced acoustic cloak based on temperature variations</b>	<b>151</b>
12.1	Transformation acoustics cloak . . . . .	151
12.2	Reduced implementation of an acoustic cloak through temperature variations . . . . .	153
12.3	Results . . . . .	157

<b>13 Two-dimensional cloak based on scattering cancellation</b>	<b>163</b>
13.1 Design . . . . .	163
13.2 Sample and experimental setup . . . . .	166
13.3 Results . . . . .	170
<b>14 Three-dimensional cloak based on scattering cancellation</b>	<b>175</b>
14.1 Design . . . . .	175
14.2 Sample and experimental setup . . . . .	181
14.3 Results . . . . .	184
<b>Concluding remarks</b>	<b>191</b>
Conclusions . . . . .	191
Future work . . . . .	193
<b>Appendix</b>	<b>197</b>
<b>A Calculation of T matrix through the finite element method</b>	<b>197</b>
A.1 Introduction . . . . .	197
A.2 Procedure . . . . .	198
A.3 Example . . . . .	199
<b>B Publications</b>	<b>201</b>
B.1 Articles directly related with this PhD work . . . . .	201
B.2 Articles in related topics . . . . .	202
B.3 International Meetings and Conferences . . . . .	203
